2.5L Concentrate

**BEFORE**

**AFTER**

**Works on paths, patios,  
decking, brick, stone,  
roofs and much more!**

**Easy to use. No need to rinse!**

# Frequently asked questions

## What is Algon Patio Cleaner suitable for use on?

Tarmac, flagstones, decking, conservatories (glass and plastic), slate and felt roofs, walls (painted and unpainted), greenhouses, garden statues, plant pots, pebbles, canopies and fabrics, ponds, bird baths, ornamental water features\*, astroturf and similar, all-weather tennis courts, access ramps, car parks, play areas and more.

## What are the results?

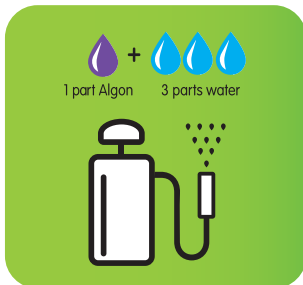

Algon Patio Cleaner will start to clear the surface within a week or so and stays active, cleaning progressively for months to come. Oil stains and grime will require alternative treatment.

## When to apply?

Any time of year. Best in dry conditions.

## How to apply?

For best results apply in dry conditions allowing the application enough time to dry before rain is expected. For the concentrate, dilute 1 part Algon Patio Cleaner to 3 parts water and apply preferably with a garden sprayer set to deliver droplets. Alternatively a soft broom or paintbrush will do; a watering can is often wasteful. Wet the surface evenly, spreading at approximately 5-6sq.m per litre as suggested below.

Algon Patio Cleaner will scorch grass, foliage and flowers where it makes contact. Excess wetting or puddling may result in small patches of white residue forming; this is harmless and will weather away. Non-metallic implements are recommended for application purposes; rinse implements after use. Do not throw rinse water on grass or plants.

## What area will it cover?

2.5ltr container - 60sq.m approx.  
20ltr drum - 480sq.m approx.

## Do I rinse it off later?

No, simply leave to allow the active ingredients time to work.

## How long will the treatment last?

Approximately nine months to one year. This depends on the absorbency of the material being treated, its location and the weather conditions.

## What about plants?

Algon Patio Cleaner will scorch grass, foliage and flowers where it makes contact; normal overspray or run off falling on soil will not harm establish roots but care should be taken to always keep this to a minimum.

## Can I use Algon Patio Cleaner for water features?

Yes, if it does not contain fish / plants. Preferably rinse bird baths after treatment.

## Storage?

Algon Patio Cleaner has a shelf life of many years.

\*A small amount of Algon Patio Cleaner entering pond water will not harm fish or plant life but care should be taken to keep run-off to a minimum when working around ponds. **Caution:** Algon Patio Cleaner is not recommended for use on marble, unpainted steel and galvanised surfaces. May temporarily discolour lead. **Spot test colour paving flags. Spot test any material not listed.** Always read the label. For more details please contact us or visit our website.
